<sup>1</sup> The consumption and emission values shown were determined according to the statutory legal measurement procedures. The fuel consumption and emission values shown are based on the Worldwide Harmonised Light Vehicles Test Procedure (WLTP). Further information on the WLTP measurement procedures can be found at <https://www.genesis.com/de/en/wltp.html>. The optional equipment you have selected during configuration may result in your configured model corresponding to a different approved vehicle type than a vehicle without the optional equipment. This may also cause deviations in the values for the configured model. For more information on official fuel consumption and CO<sub>2</sub> emission data for new cars, please refer to the 'Guide on the Fuel Economy, CO<sub>2</sub> Emissions and Power Consumption of All New Passenger Car Models Offered for Sale on the German Market' published free of charge by DAT Deutsche Automobil Treuhand GmbH, Hellmuth-Hirth-Straße 1, D-73760 Ostfildern, Germany, [www.dat.de/co2/](http://www.dat.de/co2/).

<sup>2</sup> Boost mode only available on Sport Plus Pack. Boost mode adds a 10-second power boost thanks to the additional 20 kW per each motor.

<sup>3</sup> 18 minute charge is based on 800 V from ultra-rapid chargers (350 kW). Actual charging time will vary and is dependent on a number of factors including battery temperature, condition and age, ambient temperature and the power provided by the charger. Charge time increases in cold weather and if battery temperature activates safeguarding technology.
